MANITOBA REGIONAL

POPULATION PROJECTIONS

1996-2021

MBS 99-3

PRICE: $50

JUNE 1999

Manitoba
Bureau of
Statistics

I. EXECUTIVE SUMMARY

Population projections have been prepared for the 8 Economic Regions of Manitoba during the period 1996-2021. These projections are compatible with the MEDIUM level Manitoba population projections prepared by the Manitoba Bureau of Statistics.

At the province level, assumptions made for the projections are:

a) A constant total fertility rate of 1.80.
b) Net international migration of 3,000 persons per year.
c) Net interprovincial migration of -4,000 persons per year.
d) A moderate increase in life expectancy.

Under these regional population projections, the 8 regions can be placed into 3 groups based upon the projected population change between 1996 and 2021 (population up significantly, population up slightly, and population down).

The 6 regions **Southeast, South Central, Southwest, North Central, Interlake** and the **North** are projected to have increasing populations throughout the projection period.

The populations of the **Winnipeg** and **Parklands** regions are projected to decrease by 5.0% and 5.6% respectively between 1996 and 2021.

For the **Winnipeg** region, the population drop of 31,500 (from 631,300 in 1996 to 599,800 in 2021) is due to a projected annual interprovincial migration outflow of -3,050 and an annual intraprovincial migration outflow of -900 for the projection period. This outflow is partially offset by an annual international migration inflow of 2,420.

For the **Parklands**, the population loss of 2,600 (from 46,800 in 1996 to 44,200 in 2021) is due to a natural decrease (more deaths than births) averaging -70 per year, as well as a projected annual net migration outflow of -30.

The **North Central** region is projected to have the smallest population increase at 3,100 (6.5%) by the year 2021.

The **Southwest** will have the smallest projected percentage population increase at 3%, based on a projected increase of 3,200 above the 1996 population of 106,700.

The **Southeast** region will have the largest projected overall population increase at 28,900 (a 34.2% increase over the 1996 population of 84,500).

II. INTRODUCTION

This report presents population projections for the 8 Manitoba Economic Regions during the period July 1, 1996 - June 30, 2021. The 8 Economic Regions (also known as Official Regions for Data Collection) are aggregations of the 23 census divisions as follows:

ECONOMIC REGION	CENSUS DIVISIONS	1996 BASE POPULATION
Southeast	1, 2, 12	84,500
South Central	3, 4	51,800
Southwest	5, 6, 7, 15	106,700
North Central	8, 9, 10	47,900
Winnipeg	11	631,300
Interlake	13, 14, 18	80,200
Parklands	16, 17, 20	46,800
North	19, 21, 22, 23	85,200
	TOTAL	1,134,300

These regional projections are compatible with the medium level Manitoba population projections recently released by the Manitoba Bureau of Statistics. The base population for these projections is the Statistics Canada 1996 Post-Censal population estimate of 1,134,300 for Manitoba distributed on a regional basis.

Projections are not forecasts but are based on what would occur if the stated assumptions hold true. The assumptions are based on recent trends and reflect the impact on regional populations if these trends were to continue. As the process of change is cumulative, the reliability of the projections may decrease over time.

Population projections can be prepared for departments' and agencies' user-defined areas, departmental regions or special sub-populations on a cost-recovery basis.

To obtain further information on this report or to order custom projections, please contact David Greenwood at (204) 945-2989.

Table 1. Projected Regional Population by Year: 1996 to 2021 — **Both Sexes**

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1996	84,500	51,800	106,700	47,900	631,300	80,200	46,800	85,200	1,134,300
1997	85,700	52,200	106,500	48,100	629,500	81,400	46,700	86,800	1,136,800
1998	86,600	52,400	106,500	48,200	628,500	82,100	46,500	87,700	1,138,400
1999	87,600	52,600	106,500	48,300	627,900	82,800	46,300	88,500	1,140,500

III. PROJECTED REGIONAL POPULATION 1996 - 2021

Table 1 illustrates the annual projected population for Manitoba and its Economic Regions over the period 1996 - 2021. During this time, the population of Manitoba is projected to increase by 55,200 (4.9%).

Based on the projected population changes, the 8 regions fall into three groups. The major reason for these groupings is the impact of inter-provincial migration (negative for all regions) and intra-provincial migration (only Southeast, Southwest, North Central, and Interlake are positive) on the projected regional populations.

GROUP 1 The regions in this group (Southeast, South Central, Interlake and the North) are all projected to increase in population throughout the projection period.

These regions are also projected to increase their proportion of Manitoba's population (as shown in Appendix C). The Southeast's share is to increase by 2.08 percentage points (from 7.45% to 9.53%) while South Central's share is increasing 0.63 points (from 4.57% to 5.20%). The Interlake's share is projected to increase by 1.21 points in the next 25 years. An increase of 1.80 percentage points is projected for the North.

GROUP 2 The Southwest and North Central regions are projected to have small population increases over the projection period. The population of the Southwest is projected to increase by 3.0% (3,200) over the projection period. From a 1996 base of 47,900, the population of North Central is projected to increase 3,100 (6.5%) by the year 2021.

During this time period, the North Central's share of Manitoba's population is projected to increase slowly to 4.29% in 2021 from a value of 4.22% in 1996. The Southwest is projected to have a population share decrease (from 9.41% down to 9.24% by the year 2021).

GROUP 3 The 2 regions in this last group (Parklands and Winnipeg) are projected to have a population decline for the next quarter century. The population of Parklands is projected to fall 2,600 (5.6% of the 1996 base 46,800) while the population of Winnipeg is projected to decline 31,500 (5.0% of the 1996 population of 631,300).

The Parklands' share of Manitoba's population will show a gradual decline, from 4.13% of Manitoba's population in 1996 down to 3.72% by the year 2021. Winnipeg's share is projected to have a large decrease from 55.66% in 1996 to 50.42% by 2021.

Details of the projected regional populations are presented in Appendix A - D.

June 1999

IV. PROJECTED POPULATION COMPONENTS

i) BIRTHS

This section presents the projected births for the 8 Economic Regions to the end of the projection period. For projection purposes, the number of births is determined by the number of females 15 - 49 years of age, the total fertility rate, and the age specific distribution of the total fertility rate.

The total fertility rate for each region is shown in Table 3 below with the projected rates being the estimated rates for 1998. The age specific distribution of the total fertility rate is the latest 4 year average for Manitoba.

With these assumptions, the projected number of births is solely determined from the number of females in each age category between 15 and 49 years of age.

TABLE 3: TOTAL FERTILITY RATES BY REGION

	OBSERVED					PROJECTED
REGION	1976	1981	1986	1991	1996	
Southeast	2.62	2.25	2.21	2.11	2.00	2.09
South Central	2.59	2.51	2.26	2.34	2.31	2.23
Southwest	2.19	2.03	1.90	1.87	1.78	1.65
North Central	2.41	2.24	2.21	2.24	2.31	2.35
Winnipeg	1.70	1.58	1.67	1.79	1.68	1.60
Interlake	2.17	1.85	2.00	1.68	2.01	1.81
Parklands	2.49	2.28	2.40	2.04	2.13	1.84
North	3.17	2.89	2.61	2.97	2.98	2.77
Manitoba	2.02	1.86	1.89	1.95	1.90	1.80

The Southeast will have a marked increase in the projected number of births, increasing by 510 or 48.1% over the 1996 level of 1,060. This is in comparison to Winnipeg, which is projected to have a drop of 26.1% during the next quarter century.

For the other 6 regions, the pattern of births is to be determined by the age structure of the female population, especially in the peak child-bearing years (ages 20 - 35 years).

South Central, Southwest, North Central, Interlake and Parklands are projected to begin with an increase and then a projected decrease in the number of births.

The North region is projected to have a short-term decrease in the number of births before increasing for the last part of the projection period.

Table 4. Projected Regional Deaths by Year: 1996 to 2020 **Both Sexes**

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1996	600	520	1,160	400	5,080	660	590	430	9,440
1997	610	520	1,160	400	5,130	670	590	430	9,510
1998	630	520	1,170	400	5,220	690	600	440	9,670
1999	640	520	1,170	410	5,310	700	600	450	9,800
2000	660	530	1,180	410	5,400	720	600	450	9,950

June 1999

ii) DEATHS

This section presents the projected number of deaths for each of the Economic Regions. For projection purposes, the number of deaths is derived from the life expectancy at birth for each region.

From the life expectancy tables, survival rates by sex and single years of age were determined. These survival rates are then used as the probability of a person being alive at the start of the following year.

During the next 25 years, moderate increases in life expectancy at birth have been projected. These increases range from 1.2 years for females in all regions but the North, to 3.5 years for males in the North. Males in all other regions are projected to have an increase of 2.5 years in life expectancy while North females are projected to have an increase of 2.0 years.

TABLE 5: LIFE EXPECTANCY AT BIRTH BY REGION (In Years)

	FEMALE		MALE	
REGION	1996	2021	1996	2021
Southeast	82.4	83.6	76.4	78.9
South Central	82.1	83.3	77.5	80.0
Southwest	81.2	82.4	76.0	78.5
North Central	80.8	82.0	76.2	78.7
Winnipeg	80.8	82.0	75.6	78.1
Interlake	79.6	80.8	75.3	77.8
Parklands	81.1	82.3	74.5	77.0
North	76.4	78.4	70.6	74.1
Manitoba	80.7	82.0	75.4	78.0

For the Southeast, the number of deaths is projected to increase by 410 (68.3%) to the end of the projection period. In contrast, the number of deaths in the South Central and North Central regions are projected to increase by 30 and 90 (5.8% and 22.5% respectively) during the same period.

The Parklands region is projected to have an increased number of deaths for the next 6 years before a projected decline over the last part of the projection period. The number of deaths in the Southwest is projected to increase to 1,210 by 2006, and then remain around that level. Over the next quarter century, the number of deaths in the Southwest will increase by 5.2% while a decline of 5.1% is projected for the number of Parklands deaths.

For the North, Winnipeg and Interlake regions increases of 81.4%, 34.1% and 57.6% respectively are projected in the number of deaths.

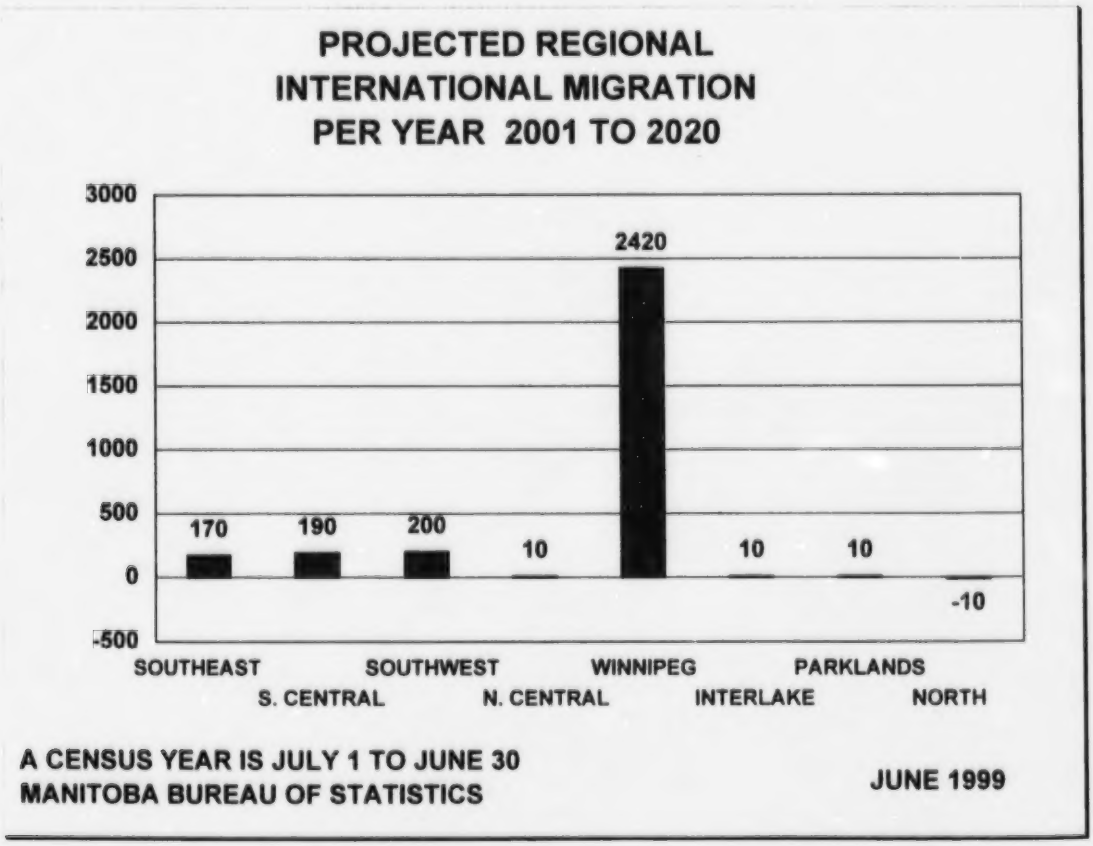
Table 6. Projected Regional Net International Migration: 1996 to 2020 **Both Sexes**

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1996	160	240	200	60	2,040	-30	0	80	2,700
1997	90	140	120	0	1,620	0	0	0	2,000
1998	120	150	140	-10	1,820	-10	10	-30	2,200
1999	140	170	160	10	2,050	-10	10	-20	2,500
2000	160	180	190	10	2,260	10	10	-10	2,800
2001	170	190	200	10	2,420	10	10	-10	3,000
↓	↓	↓	↓	↓	↓	↓	↓	↓	↓
2020	170	190	200	10	2,420	10	10	-10	3,000

Note: A Census Year is July 1 to June 30

Manitoba Bureau of Statistics **June 1999**

For these projections, immigration is projected to be 4,200 annually, returning Canadians at 1,000 with no net change in non-permanent residents, while emigration is projected at 2,200 annually.



MIGRATION SCENARIOS

As the most volatile component of population growth, migration has the greatest impact on the year-to-year change in the population of Manitoba's regions.

For these regional projections, the migration scenarios have been developed using the IN and OUT flows for each of the three components: international, interprovincial and intraprovincial. However, in this report only the net figure is presented for each migration component.

The data presented are estimates of the regional migration distributions for the 5 year period July 1991 to June 1996. The data for the projection period has been calculated from the historical percentage distribution for each region and the projected Manitoba level for each migration component.

iii) INTERNATIONAL MIGRATION

TABLE 7: INTERNATIONAL MIGRATION BY REGION 1991 TO 1996

	IMMIGRATION (*)		EMIGRATION	
REGION	5 YEAR AVERAGE	PERCENT DIST'N	5 YEAR AVERAGE	PERCENT DIST'N
Southeast	190	3.7%	130	5.9%
South Central	260	5.0	50	2.3
Southwest	330	6.4	140	6.3
North Central	50	1.0	40	1.8
Winnipeg	4,140	80.4	1,680	76.0
Interlake	60	1.2	80	3.6
Parklands	60	1.2	30	1.4
North	60	1.2	60	2.7
Manitoba	5,150	100.0%	2,210	100.0%

* Includes immigrants (annual average 4,420), Returning Canadians (average 1,080) and net change in the number of non-permanent residents (average -360).

As shown in Table 7, the majority of international migrants to Manitoba in the last 5 years have moved to Winnipeg. This dominance is projected to continue as shown in Table 6.

Although a small component of population growth for the other regions, it is projected that most regions will have positive international migration throughout the projection period although the North region will be -10 for the majority of the period.

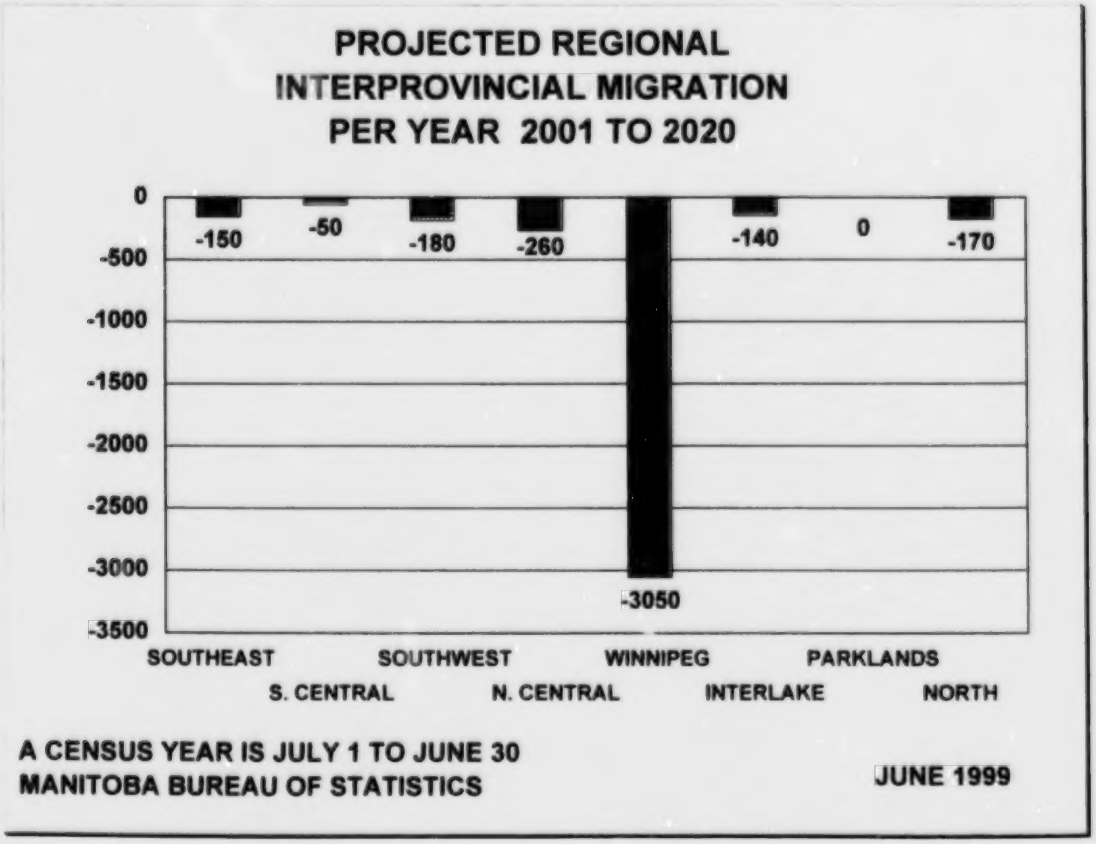
Table 8. Projected Regional Net Interprovincial Migration: 1996 to 2020 **Both Sexes**

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1996	-70	-40	-490	-130	-4,590	-170	-170	-220	-5,900
1997	-210	-80	-310	-310	-4,010	-200	-10	-270	-5,400
1998	-190	-70	-240	-280	-3,530	-170	10	-220	-4,600
1999	-150	-50	-180	-260	-3,070	-140	0	-170	-4,000
2000	-150	-50	-180	-260	-3,050	-140	0	-170	-4,000
2001	-150	-50	-180	-260	-3,050	-140	0	-170	-4,000
↓	↓	↓	↓	↓	↓	↓	↓	↓	↓
2020	-150	-50	-180	-260	-3,050	-140	0	-170	-4,000

Note: A Census Year is July 1 to June 30

Manitoba Bureau of Statistics **June 1999**

The above value for Manitoba is based on an INFLOW of 17,000 and an OUTFLOW of 21,000 per year from 1999 onward.



iv) INTERPROVINCIAL MIGRATION

Interprovincial migration (movements of Canadians between Provinces) is the most volatile component of the three migration types and can have the greatest impact on the year-to-year change in the populations of Manitoba's regions.

Table 9 shows the recent distribution of net interprovincial migration by region for the period 1991 to 1996. As can be seen, most regions lost population due to interprovincial migration during this time period. The Parklands was the only exception.

TABLE 9: INTERPROVINCIAL MIGRATION BY REGION 1991 TO 1996

	IN		OUT	
	5 YEAR AVERAGE	PERCENT DIST'N	5 YEAR AVERAGE	PERCENT DIST'N
Southeast	750	4.8%	920	4.5%
South Central	410	2.6	480	2.3
Southwest	1,800	11.5	2,120	10.3
North Central	480	3.1	750	3.7
Winnipeg	9,690	62.1	13,340	65.0
Interlake	660	4.2	840	4.1
Parklands	630	4.0	630	3.1
North	1,200	7.7	1,450	7.1
Manitoba	15,600	100.0%	20,520	100.0%

This population loss to interprovincial migration is projected to continue throughout the projection period. However, due to the ageing of the population and a decreased propensity to migrate, the net interprovincial migration is projected to moderate from the levels of -5,900 in 1996, -5,400 in 1997 to -4,000 per year for most of the projection period.

Winnipeg, which had the largest projected population loss at -4,590 for 1996, will moderate to -3,050 by the year 2000.

The outflow for North Central is projected to be the next highest at -260, for most of the projection period.

South Central is projected to have a smaller outflow at -50, while from 1996 on, the Parklands region will have a total outflow of -170 over the projection period.

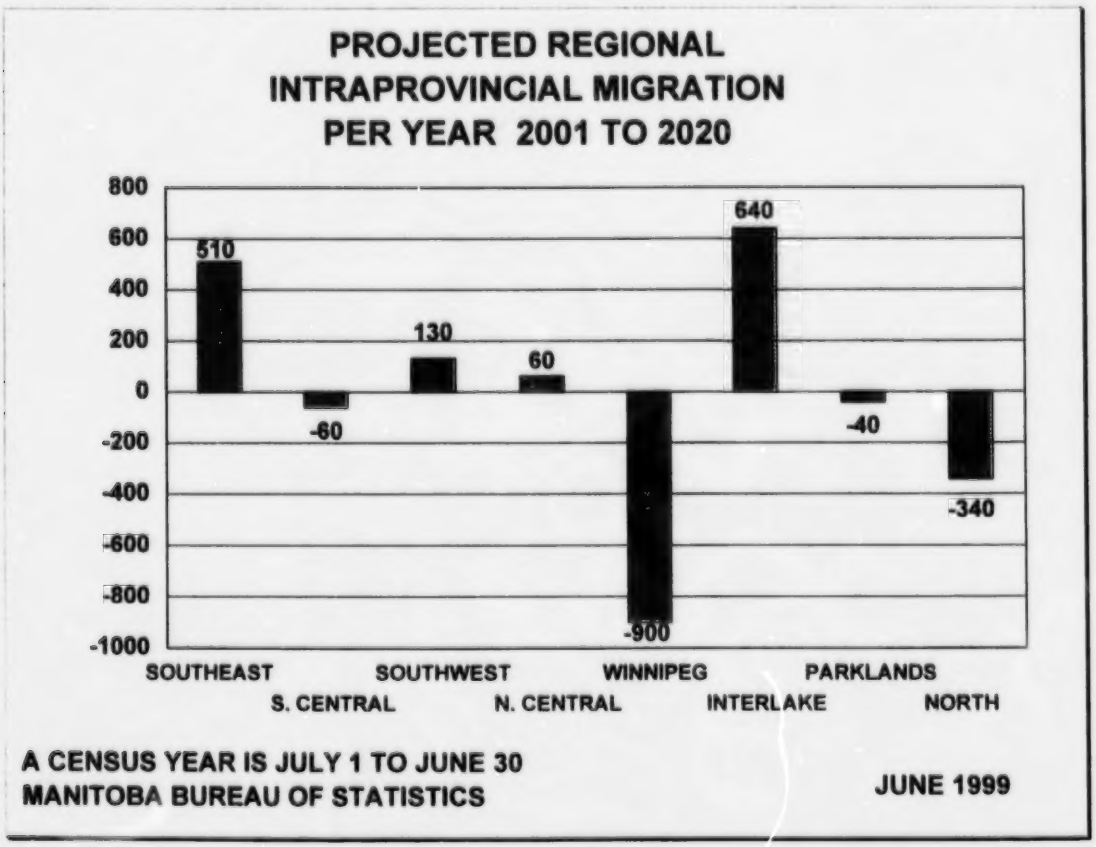
Meanwhile the Southeast, Southwest, Interlake and North are projected to have moderate outflows of -150, -180, -140 and -170 respectively.

Table 10. Projected Regional Net Intraprovincial Migration: 1996 to 2020 **Both Sexes**

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1996	610	-40	80	-60	-2,070	1,190	130	160	0
1997	600	-80	150	70	-1,040	750	-50	-400	0
1998	570	-70	150	70	-1,020	730	-40	-390	0
1999	550	-70	140	70	-970	700	-50	-370	0
2000	530	-60	140	60	-850	670	-40	-450	0
2001	510	-60	130	60	-900	640	-40	-340	0
↓	↓	↓	↓	↓	↓	↓	↓	↓	↓
2020	510	-60	130	60	-900	640	-40	-340	0

Note: A Census Year is July 1 to June 30

Manitoba Bureau of Statistics **June 1999**



v) INTRAPROVINCIAL MIGRATION

Table 11 below, illustrates the net intraprovincial migration (movements of Manitobans between regions of Manitoba) for the 5 year period 1991 to 1996.

During this period, population gains from intraprovincial migration were registered by Southeast, Southwest, North Central and Interlake. The remaining regions registered losses for this type of migration with Winnipeg having the largest loss at -1,100 persons annually.

TABLE 11: INTRAPROVINCIAL MIGRATION BY REGION 1991 TO 1996

	IN		OUT	
	5 YEAR AVERAGE	PERCENT DIST'N	5 YEAR AVERAGE	PERCENT DIST'N
Southeast	3,390	13.0%	2,770	10.6%
South Central	1,080	4.2	1,150	4.4
Southwest	2,550	9.8	2,380	9.2
North Central	1,670	6.4	1,600	6.1
Winnipeg	9,010	34.6	10,110	38.8
Interlake	3,850	14.8	3,080	11.8
Parklands	1,460	5.6	1,500	5.8
North	3,020	11.6	3,430	13.2
Manitoba	26,030	100.0%	26,030	100.0%

Intraprovincial flows between Manitoba regions are projected to be 22,000 for the last 20 years of the projection period. This will result in smaller projected population flows than shown in Table 11 above.

As shown in Table 10 opposite, Winnipeg is projected to have a significant net intraprovincial outflow for the entire projection period with an annual rate of -900 for the final 20 years.

The South Central, Parklands and North regions are projected to have more moderate net outflows of -60, -40, and -340 respectively for the same time period.

The Southwest and North Central regions are projected to have net inflows of 130 and 60 persons per year respectively, during the same period.

Interlake and Southeast are projected to have annual net inflows of 640 and 510 persons after 2001.

Table 12. Projected Regional Net Total Migration by Year: 1996 to 2020 **Both Sexes**

Census Year	Southeast	South Central	Southwest	North Central	Winnipeg	Interlake	Parklands	North	Manitoba
1996	710	160	-220	-130	-4,620	990	-50	10	-3,100

June 1999

iv) TOTAL MIGRATION

Total migration is the sum of the three migration components as described on the previous pages. Table 12 shows the projected total migration for each region. For migration purposes, the regions appear to fall into two groups.

The first group, consisting of Southeast, South Central, Southwest, and Interlake, is projected to have positive total migration.

For the Southeast, a net value of 710 for 1996 is projected to decrease to 530 persons and remain at that level. This would result in the largest total population gain, from migration, of 13,380 over the projection period.

For the South Central, a one-time net loss in 1997 but turning positive for the remainder of the projection period results in a population gain from migration of 1,870 over the 25 year period.

The Southwest is projected to gain from migration at an annual rate of 150 for the last 21 years. The total population gain from migration for the Southwest in the next quarter century is projected to be 3,060.

The Interlake region is projected to decrease from the 1996 level of 990 to 510 and remain there for the next 20 years. The total population gain from migration is projected to be 13,380.

The second group, consisting of the remaining four regions, is projected to have a migration outflow for the entire period but this outflow will moderate throughout the projection period.

Winnipeg will have the largest population loss due to migration with annual outflows projected from -4,620 in 1996 moderating to -1,530 by 2001. The total migration loss for the period is projected to be -45,010.

For the North Central, a total projected outflow of -4,760 will be the result of a peak outflow of -240 decreasing to -190 by 2001.

An outflow of -50 in 1996 dropping to -30 by 2001 will lead to a projected total loss of -810 for the Parklands region.

North is the last region in this group, with a total projected migration loss of -12,880. This will be the result of projected annual losses starting with -670 in 1996, and moderating to -520 by 2001.

APPENDIX

Table A1. Projected Components of Population Growth for the Southeast Region — Both Sexes

Census Year	Population (July 1)	Births	Deaths	Natural Increase	MIGRATION: Inter-Provincial	MIGRATION: Intra-Provincial	MIGRATION: Inter-National	Total Net
1996	84,500	1,060	600	460	-70	610	160	710
